Results Highlights

Despite headwinds in Hong Kong and Chinese Mainland retail, the car park segment remained steady, while international retail sustained momentum

NPI was impacted by negative rental reversions from Hong Kong and Chinese Mainland retail and higher operating costs from statutory wage adjustments

The prospect of US rate cuts is expected to ease financing costs and alleviate valuation pressures from cap rates decompression

Continued to manage costs prudently across the organisation, focusing on efficiencies and supplier collaboration to mitigate external pressures

Remained committed to diversifying capital sources and asset exposure to enhance business resilience through interest rate cycles and geopolitical shifts
